Technical Skills

Languages/Frameworks:

JavaScript (React + React Native), Node.js, HTML5/CSS3, SQL, Golang (*competent*)

Software/Tools:

Git, MySQL

Education

Cleveland State University
– *Environmental Studies*

Self taught developer passionate about JavaScript, OSS, and technology in general. Currently pursuing a career as a software engineer, primarily focused on frontend development. In search of a position to both contribute and display my skillset while taking full advantage of the environment to further my knowledge and appreciation for the industry.

Previous Work Experience

Focus Camera, eCommerce Manager, Brooklyn, New York – 2014-2017

- Managed various third party web services, performing CRUD operations pertaining to product content
- Published ad hoc reports and proposed action plans contingent on data analysis, substantially improving sales performance year-over-year
- Implemented strategic distribution and pricing campaigns to improve our competitiveness within the marketplace

PetFlow, eCommerce Analyst, New York, New York – 2013

- Managed client accounts and provided product support
- Tracked local database activity addressing any incoming issues
- Provided real-time inventory analysis helping to minimize shipping conflicts

Select Open Source Projects

NYT Bestsellers Desktop & Mobile (ongoing)

Application to view real-time lists of New York Times Best Sellers

Spur.js (ongoing)

XHR wrapper to make server requests a breeze
