Brooklyn, New York | (216) 835-0847 | [dwightsmth@gmail.com](mailto:dwrightsmth@gmail.com) | [linkedin.com/in/dwrightsmth](https://www.linkedin.com/in/dwrightsmth)

Fullstack Software Developer with 7+ years of experience building scalable, enterprise level web applications with a focus on the strategic design and implementation of next generation platforms built with modern technologies. A self-motivated team player who pays close attention to detail and works collaboratively across teams to deliver high quality software in a fast-paced environment. A creative thinker committed to continuous growth and improvement intent on finding the next opportunity to contribute my skills.

Experience

Gogotech, New York, NY - Fullstack Software Developer

August 2017 - November 2022

- Implemented core features for a high traffic ecommerce web application using modern technologies such as ReactJS and TypeScript helping to improve development speed, team productivity and user experience
- Developed and maintained RESTful API services using .Net Core and C# to upgrade network communications between backend and frontend applications
- Built a proprietary automated testing suite utilizing the Selenium framework which reduced reported issues by 40%
- Provided leadership to off-shore team members via mentoring, code reviews and training activities

Focus Camera, Brooklyn, NY - Web Designer

September 2014 - February 2017

- Designed and developed user interfaces using HTML, CSS, and JavaScript programming languages
- Collaborated interdepartmentally to curate and deliver tailored online content to facilitate sales growth
- Produced workflow diagrams, wireframes and prototypes to initiate and execute design campaigns

Petflow, New York, NY - Data Analyst

August 2013 - May 2014

- Delivered valuable research data to senior executives for various organizational efforts by utilizing Python scripts and CRM software tools
- Standardized automated reporting procedures by providing technical documentation helping to streamline workload
- Conducted weekly status meetings with team members providing crucial updates and feedback regarding objectives
