Technical Skills

Languages/Frameworks:

JavaScript (React + React Native), Node.js, HTML5/CSS3, SQL, Golang *(competent)*

Software/Tools:

Git, MySQL

Education

Cleveland State University
 — *Environmental Studies*

Frontend web developer with strong technical abilities, eager to contribute from day one. Overly passionate about JavaScript, OSS, and technology in general. I thoroughly enjoy leaving my comfort zone to learn new ideas and concepts, eventually putting them into practice. Looking to take my skillset and knowledge of computer science to the next level.

Previous Work Experience

Focus Camera, eCommerce Manager, Brooklyn, New York — 2014-2017

- Managed primary content through third-party software, while providing additional services such as web design and photo editing.

- Executed e-marketing strategies, successfully improving company's online presence and increasing department sales year-over-year.

- Collaborated with developers, supplying backend assistance for multiple company websites.

- Coordinated communication between various internal departments and outside vendors through online applications, bi-monthly conference calls, and in-person meetings.

PetFlow, eCommerce Analyst, New York, New York — 2013

- Tracked database activity addressing any incoming issues related to customer accounts.

- Provided real-time inventory analysis helping to minimize shipping conflicts.

- Conducted client research and assisted in advertising campaigns.

- Participated in various initiatives to improve company's online presence.
